

EEE Safe DAT Benefits

EEESafe– The Regulation of the Unregulated Sector backed by a Trade Association

EEESafe DATs

This is a Certification Mark

Register to become an EEE Safe DAT (Domestic Appliance Technician).

Becoming a DAT is becoming a **proven Competent Person** in Appliance Repairs. If you are in the trade right now and have conducted safe repairs within the last 3 months. You can get involved for a modest cost, which we feel will bring you new business and more revenue earning opportunities.

Registration will only cost you £45 and will secure your presence in the market when consumers start to ask for EEESafe DATs, to do their local repairs. WRAP issue protocols for Reuse, but EEESafe is about proven competency and evidenced by a 3rd Party Register who are knowledgeable in repairs, operate in the Repair Sector and supported by a Trade Association.

The Certification is for existing trade professionals and the Qualification (DARq). **Domestic Appliance Repairer Qualified**, will be for those who complete our Training Programme (currently in Pilot). DATs who successfully register with us will be recognised by their current experience and supplied evidence and must pass a short assessment of their Ohms Law comprehension.

EEESafe DATs must record safety readings when repairing on site and provide evidence when renewing their Cards. Customer and Appliance Safety in the Home are of paramount importance. The EEESafe Brand exceeds any Reuse Protocols or Repair methods currently in operation and is more efficient and safer. Already, Local Authorities and Trading Standards are being informed of the Certification. If you are not prepared to comply then EEESafe is not for you. **Register interest at our Website.**
